MEMORANDUM FOR RECORD

SUBJECT: Continuation of MIAS Advanced Training (U)

1. (U) Reference Memo, IAGPA-F-SD, INSCOM, 28 Mar 84, subject: Trip Report - Advanced Training 19-23 Mar 84 (U)(inclosed).
2. (S/CL-3/NOFORN) Intelligence information may be collected using several psychoenergetic techniques. CENTER LANE (CL) has focused its resources on those techniques that have been scientifically researched.
3. (S/CL-3/NOFORN) Concurrently, CENTER LANE has investigated less researched techniques endeavoring to improve CL capabilities. In July 1983, the CENTER LANE office awarded a personal services contract to Mr. Robert Monroe, Monroe Institute of Applied Science, Faber, VA to examine the use of his technology (HEMI-SYNC) in the psychoenergetic intelligence collection process. The contract was aimed initially at training a seasoned CL source to improve his target resolution via the use of a HEMI-SYNC environment. Better than expected results and personnel changes have now altered that thrust. The objectives of the advanced training are now two fold:
 - a. (S/CL-3/NOFORN) Train source in HEMI-SYNC in anticipation of his continued participation in CL as a private consultant after his retirement.

b. (S/CL-3/NOFORN) Determine if the "discrete state" psychoenergetic technique provides high resolution target information of intelligence value. This determination can only be made by using an experienced, reliable source.

4. (S/CL-4/NOFORN) I concur with the recommendation in paragraph 5 of referenced memo. I am aware that Mr. McMoneagle will retire soon after completion of the training, but I view the continuation of the contract as application development that will have use in the future. Completion of the contract is no different than the earlier contracts with SRI-International in which they tested and proved coordinate remote viewing with non GRILL FLAME/CENTER LANE sources. The contract will permit program management to assess future training opportunities as well as enhance Mr. McMoneagle's capability for future use.
